Extender Straps to Fit Large Sizes!!

New: Extender Straps to Fit Large Sizes!!

We have all experienced trying to fit larger size patients or clients for braces, supports, or therapy wraps... and we all know how difficult it is to find the right size product and then to be lucky enough to have that product fit properly.

PolyGel has found a simple solution and, yet, another way to differentiate our ThermoActive product line from others on the market. We have created simple Velcro® compatible extension straps that will now be included with those ThermoActive models where the straps are applicable.

Open Knee Support with 1 extension strap ready to be attached

Open Knee Support with Extension straps added to existing straps

Each strap adds up to 10" in circumference by simply attaching it to the existing support or straps. Since these attach with the simple hook and loop fasteners, almost any additional length up to 10" can be achieved. If you only need to add 2 or 3 inches – no problem – just stick the extenders to the place on the support that achieves that length. The Velcro® compatible tabs on the straps allow for ease of customization.

Do you need to completely surround the knee with the gel pack? Simply attach an additional gel pack to the extenders and wrap around the back of the knee. Appropriate ThermoActive gel pack item #'s to use for this purpose include: 6002-GP and 6007-GP.

Going forward, a pair of extender straps will be included with all of the ThermoActive Supports at no additional charge. These will also be available for purchase if you need additional extenders at a price of only \$10.00 a pair.

Velcro® is a registered trademark of Velcro Industries B.V.

Free Offer

Since this is a new addition to the existing ThermoActive line, if you have ordered supports from us and would like to get a free sample of the extenders, please call us at **973-884-8995** or toll free at **866-628-7243** or e-mail us at info@thermoactive.net, and we will gladly help you in getting those to you.

For new customers, please feel free to contact us to find out about our special discounted kit pricing and discounted case quantity pricing.

Polygel Receives Official SADMERC L-Code Approval for Shoulder Support (Orthosis) L3670

PolyGel® is proud to announce that our ThermoActive™ Cold & Hot Mobile Compression Shoulder Orthosis has been SADMERC - approved for L Code L3670.

This is the most unique Shoulder Orthosis on the market. It simultaneously combines the support of a shoulder orthosis, adjustable compression, and the ability to apply either cold or hot therapy when required.

ThermoActive™ Shoulder Orthoses are available in both left and

right models to:

1. Make fitting without shoulder motion easier
2. Make use and adjustment of the compression bulb more convenient
3. Keep the 'arm' straps pulling towards the patient for ease of use and adjustments

Due to its ability to apply either cold or hot therapy, ThermoActive™ addresses almost every type of pain or injury, from acute to chronic to post-surgery recovery. Having additional gel packs on hand makes it even faster to switch from hot to cold therapy or vice-versa in the same session or practice. Medical professionals and their patients will find that all ThermoActive™ products are easy to use in the office or at home.

If you need to see official copies of the letters, please go to our website at www.thermoactive.net and click on L-Code SADMERC Approval. (Direct link below)

Shoppers Drug Mart in Canada Selling Thermoactive at Retail Stores

PolyGel is very proud of our newly formed partnership with Canada's leading pharmacy and home health care retailer, Shoppers Drug Mart.

Shoppers Drug is carrying the ThermoActive line in their Shoppers Home Health Care® stores. This is a division of Shoppers that specializes in medical equipment, home-care products, and durable mobility equipment.

Through this partnership, PolyGel developed special retail packaging in both French and English as required by Canadian guidelines. A retail display was also designed to accommodate the collection. PolyGel is now using this packaging and display as a test in select locations in the United States.
